SNEAK-PEEK INTO SUMMER SCHOOL 2024

ACADEMICS & ACTIVITIES

Our Kindergarten through 5th grade students, through science, will develop a sense of awe and wonder for the natural world God created for humans to enjoy and admire. We will discuss the character of God, through stories in the Bible that show His love, goodness, and faithfulness to us. Students will review math and reading topics they learned in the previous year, and they will touch on topics they will learn in the upcoming school year. Writing will be integrated through practice of grammar, spelling, and vocabulary. Students will also learn about social emotional topics, such as gratitude, kindness, empathy, growth mindset, and problem solving. Students will enjoy such things as gym/park time, Spanish/Mandarin, art, field trips and music.

FIELD TRIPS

ALL TRIPS SUBJECT TO CHANGE

- Lunch (optional)

MEET THE TEACHERS

Mikayla Iverson (pictured left), Abigail Wildeman (middle), and Lucero Macias (pictured right), will be our full time teachers for K-2nd, 3rd-4th, and 5th grade this summer. Miss Mikayla will teach SEL, Miss Abi will teach Bible & Science, and Miss Lucy will teach Spanish. They feel passionate about the topics they are teaching and are strategically preparing lessons for each grade.

URBAN Christian Academy

SNEAK-PEEK INTO SUMMER SCHOOL 2024

ACADEMICS & ACTIVITIES

Our 6th through 8th grade students will have devotions before every class and will cover God's Creation, expounding on the questions "Who is God?" and "What is his heart for us?". In the mornings, students will attend Math, ELA, and SEL classes. In Math, students will revisit topics from their previous grades and also be challenged by new math concepts to prepare for their upcoming school year. ELA will hone in on skills such as essay writing, reading comprehension, practicing presentations, note taking, and annotations using Science and Social Studies themes. SEL will cover topics related to building good habits, self-awareness, social awareness, and setting goals with a growth mindset.

In the afternoons, they will participate in sports such as volleyball, basketball, and badminton. They will also partake in STEM projects, cooking classes, arts, and crafts. One week is dedicated to Reality Town, where we will run a simulation designed to give students a taste of real life budgeting and finances.
